

## **LOCAL COVERAGE WITHOUT TOWER**

- Minimal and Fringe (red, yellow, gray) coverage shown along the Niagara Parkway and surrounding area
- Lack of tall infrastructure or existing telecommunication sites means a new tower is necessary
- A new structure on Line 8 Rd disguised as a flagpole installation will provide increased reach and capacity to residents in the surrounding area while creating minimal visual impact

## **FUTURE COVERAGE WITH PROPOSED SITE**

- Optimal coverage (dark and light blue) with site C3169 (Line 8) in operation
- A new 30m tower in this area will help to provide effective coverage to area residents while creating minimal visual intrusion
- The new site will help to provide reach and capacity inside and out of buildings as well as create a contiguous network with existing and future planned base station sites
